

PIANO FOR SALE

Yamaha Professional Upright Piano, Model U7HS 51" tall, bearing serial number H 3645724, made for use in the North American Market. Unusual teak case. In excellent condition with normal wear and some minor scratches to the case. No repairs needed. Maintained in a heated and air-conditioned living room. **Asking \$5,000** or best offer. Cash or bank check only. Moving the piano is the responsibility of the buyer.

Robert Furst (*Bluebook of Pianos*) evaluated this piano for the seller. He wrote, "The U7HS is a unique instrument in many ways. First of all, it is in teak, not a common finish but was a standard finish in 1980 - 1981 (when the piano was built). This was one of the very few professional upright pianos that ever offered a "True Sostenuto Pedal." (All other Yamaha verticals have a practice or mute pedal.) This top-of-the-line 51" upright also has agraffes and duplex scaling. The current suggested retail price of a corresponding new piano, which would be a YUS5SG 52" Polished Ebony, is \$17,780. A teak case is no longer available; if it were, a similar new piano in teak would easily sell for over \$20,000. This is a rare and very desirable piano."
